PROFESSIONAL SUMMARY

Results-driven Android Developer and Information Technology Engineer (GPA 3.76/4.00) with hands-on experience building mobile applications using Java and Android Studio. Passionate about creating accessible, user-centered apps - including an award-worthy sign-language learning tool for the deaf community. Proven ability to deliver end-to-end software solutions, from requirements gathering to deployment. Additional background in broadcast technology and live streaming operations from an internship at a national TV studio. Seeking a remote Android or mobile development role where I can contribute immediately and grow fast.

TECHNICAL SKILLS

Mobile: Android (Java), Android Studio, Vuforia (AR SDK)

Backend: PHP, Laravel, MySQL, REST APIs

Frontend: HTML, CSS, JavaScript

Tools: Git, GitHub, VS Code, Postman, Figma

Other: Python, Unity (Game Dev), Blender (3D), Google Colab

Languages: Indonesian (Native) · English (Professional Working Proficiency)

WORK EXPERIENCE

Full Stack Web Developer & Broadcast Technical Intern - Majelis Tafsir Al-Quran (MTA TV Studio)

Surakarta, Indonesia | Mar 2024 – May 2024

- Designed and built a full-stack inventory & loan management system using Laravel, PHP, and MySQL - replacing a manual paper-based workflow used daily by MTA TV staff.
- Conducted user interviews with 5+ staff members to define system requirements, ensuring all key features matched real operational needs.
- Performed end-to-end QA testing including functional testing and UX review; delivered a production-ready web app within a 3-month timeline.
- Assisted in operating live streaming systems and broadcast infrastructure for MTA TV's on-air programming, monitoring live transmissions and ensuring zero technical downtime during broadcasts.
- Provided real-time technical support during live programs - troubleshooting streaming issues and coordinating with the broadcast team to maintain smooth on-air delivery.

PROJECTS

Hijaiah Sign Language Translator App

Java · Android Studio · XML | 2024

- Built an Android application to help the deaf-mute community (PDSRW) learn Hijaiah Arabic letters through visual sign-language animations - addressing a real accessibility gap in Islamic education.
- Implemented 3 core features: Letter Learning with sign-language videos, Letter Matching using drag-and-drop interactions, and Interactive Quizzes for learning evaluation.
- Applied the kitabah method as an adaptive and disability-friendly learning approach within the application.

Women's Cycle & Worship Calendar App

Java · Android Studio · SQLite | 2024

- Developed a privacy-first Android app for Muslim women to track menstrual cycles, fertility windows, and prayer/fasting reminders — combining health tracking with religious guidance.
- Designed an interactive calendar UI with local notifications and offline-first SQLite storage for complete user privacy.
- Incorporated Islamic reproductive health education content validated against religious references.

EDUCATION

B.Sc. Informatics Engineering - Universitas Muhammadiyah Surakarta

Surakarta, Indonesia | Sep 2021 – Apr 2026

- GPA: 3.76 / 4.00
- Relevant Coursework: Mobile App Programming, Software Engineering, Web Frameworks, Game Programming, Computer Animation, Virtual World, Artificial Intelligence, Data Science, Algorithms & Data Structures.

ADDITIONAL

Leadership: Secretary General, Forum Open Source Informatics (FOSTI UMS) — managed administration, event planning, and organizational reporting for 20+ events (2022–2023).

: Active Member, Forum Open Source Informatics (FOSTI UMS) — contributed to member coordination and organizational activities, supported internal development and recruitment programs as part of the Organizational Division (2023–2024).

: Secretary General, Faculty Mentoring Coordinator (KMF-KI, Faculty of Communication & Informatics UMS) — oversaw administrative operations and coordinated mentoring programs across the faculty (2022–2024).

Interests: Open source contribution, mobile accessibility, Islamic tech.
